- Super 8, Belleville, KS ..... (785) 527-2112
- West Lake Inn, Downs, KS ..... (785) 454-3345

**TRANSPORTATION:**

Airstrips for small planes are available in surrounding towns close to the ranch. Contact Bonnie Benoit for more information. We will arrange for pick-up service from the small airports in our areas if notified before.

**TERMS AND CONDITIONS:**

This sale is being conducted under the suggested Terms and Conditions of the American Angus Association.

**HERD HEALTH:**

All bulls will be fertility tested. The bulls in the sale have been pre-weaned and weaning vaccinated for respiratory disease. They have been poured and dewormed.

**CATALOG UPDATE:**

A supplemental sheet will be available sale day with updated information. This sheet will take precedence over the sale catalog. We will post updates as soon as possible on our web site.

**LIVESTOCK INSURANCE:**

American Livestock Insurance Co. (Harding & Harding)  
Sheila Jensen

**LOT NUMBERS:**

Ear tags on cattle correspond with lot numbers in this book.

**DELIVERY:**

Free delivery. All bulls will be delivered free in Nebraska or Kansas, or we will keep them 30 days and you pick them up, your choice. We will start to deliver a week after the sale. You can take them home the day of the sale and we will give \$50 off each bull purchased. All bulls selling over \$3,000 outside of Kansas and Nebraska will be delivered to a central point.

**GUARANTEE:**

All bulls selling for \$2,000 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. We will not replace a dead animal if it is killed or dies for any reason. Normal care needs to be exercised toward these animals and not be allowed to get thin or neglected.

**MEALS:**

Coffee and donuts in the morning.  
Complimentary lunch will be served at 11:30 AM

**SALE DAY PHONE (785) 725-3231

Dear Cattleman and Friends,

Welcome too our 19<sup>th</sup> Annual Production Bull sale. We have had a very busy and exciting year. In July, we added a very special young lady to our family as Chad married the former Marcy Fletchall. We are very fortunate and proud to have her as part of the family.

The bulls we are offering this year are as good as we've ever offered. This group has been assembled with the breeding of the cattle the right way with something that will work for our bull customers. The bulls in the sale are not picked over, creep fed, and are fed a high roughage ration. They are selected with the most discriminating cow person in mind and are as uniform and deep in quality as you'll find anywhere. Over 50% of the bulls have a birth EPD of +2.0 or under, which is suitable for heifers. Our weaning weights were exceptional, and these bulls have excelled on test and in carcass data.

We would like to invite you to inspect our bulls that will be selling before some of the other sales to compare. We are sure that you will be pleased with both the bulls selling and our current cow herd. If there are any questions about the sale offering, please don't hesitate to give us a call at the phone number above. Also check out our web site <http://www.benoitangus.com> for new updates on the bulls.

We are always excited for a new year to visit with our old customers and to meet our new customers. We will be moving the bulls from our feeding location just south of Esbon to our sale facility on Hwy 36 on Wednesday, March 19<sup>th</sup>. They will be at the Benoit Ranch to view. We try to offer a welcome mat to anyone that comes before the sale. We hope that you can be here early on Thursday morning for a complimentary breakfast and lunch. Thanks for your interest.

Sincerely,

*Benoit Family*

Benoit Angus  
Everett & Bonnie  
Chad & Marcy  
Doug, Michelle and Family

• 6208 is a powerful son out of the 4114 bull we raised and was one of the top selling bulls in the 2005 sale going to Leon Eck. We saw how good the 4114 calves were and we bought him back. The 598 daughter, 294, is one of the top cows in the herd. If you need a bull to add power and maternal to your next calf crop, this bull will work. Dams WR 3/106.

• 7125 is another tremendous herd bull prospect out of one of our top donor cows. 241, who is the dam of Lots 30-36 and Lot 15, has great cows in her pedigree. It doesn't take long to tell how good a cow is when you breed her to several sires and her calves are all good. LaVern Koupal purchased one of the top 1023 sons in our 2007 sale out of 241. Dams WR 3/103.

**Benoit Angus will be retaining  
 1/3 revenue sharing interest in  
 all bulls selling.**

### Repeat Buyer Discount

To show our appreciation for the support of our loyal repeat customers over the years, we are starting a Repeat buyer discount. This discount will be 5% from your total purchase price if you purchased a bull in the prior years sale. This discount will involve only the previous years sale, not just any previous sale. If you didn't purchase a bull last year, but purchase a bull this year, you'll receive a 5% discount on your purchase in next year's sale should you decide to be a repeat customer. This will be an on going process that will continue in up coming years. With this new repeat buyer credit, we will discontinue the volume discounts we have given in the past. Also, the 5% discount will be determined after all credits have been subtracted from the gross purchase price.

• This well bred bull should work great on heifers. The replacements and carcass should be very good also. Dams WR 1/85.

Gentlemen,

It is my pleasure to have worked with the Benoit's nutrition program and this set of outstanding bulls. My philosophy over the past 17 years is that bull development diets should be formulated too promote fiber digestion, increase feed intake and result in excellent ADG. Experience has shown bulls fed high fiber/forage diets hold up better on pasture, stacking additional value on your genetic investment. To accomplish our feeding goals we developed these bulls on a diet consisting of Alfalfa hay, Sorghum Hay, CRP Hay, Corn Silage, Corn, and supplement that contained DDGS, Soybean meal, and Vita-Ferm mineral.

Please contrast this approach with simply increasing the amount of grain fed to put the bulls in sale condition. Many of us have had the unpleasant experience of purchasing a high value bull, only to be disappointed later as the bull falls apart on a forage diet. You have my confidence that these bulls will be solid performers, who will work hard, and stay in the herd for many years. Feel free to give me a call for more information and buy great genetics today with the utmost confidence.

Sincerely,

*Kevin Glaubius (308)-233-4012*

**The Spring bulls have not been fed any creep. The bulls were fed a high roughage ration to gain 3.5 lbs. per day to ensure soundness. Ultrasound data and daily gains will be available, on a supplemental sheet, by the 1st of March.**

**Receive a 5% discount if you purchased a bull from last years sale.**

Now **Genetics, Source** and **Group Age** can all be documented with **ONE Tag**.

## American Angus Association \$Value Indexes

### Step 1 Become a Producer Participant

To be eligible to supply cattle to the AngusSource® program, producers must have Angus-sired cattle that originate on their operation, use registered Angus bulls, have management practices which allow for the identification of cattle that are Angus-sired, and keep calving records that document the birth date of the oldest calf.

Complete the AngusSource® Producer Participant Enrollment form and Agreement. Download forms at [www.angussource.com](http://www.angussource.com) or request by calling AngusSource®.

**This information must be submitted prior to enrolling cattle.**

### Step 2 Enroll Calves/Order Tags

Enroll calves by calling AngusSource®. Provide enrollment information to AngusSource® and submit any required records. Enrollment fee: \$1 per head for visual tags, \$3.25 for RFID matched pair tags.

### Step 3 Print/Customize Documents

Print or customize AngusSource® Document for feeder cattle or replacement females. To customize, enter information about the health, management and sale date/location. Market cattle through an auction, video or direct by using the printed AngusSource® Document(s) to convey valuable information to potential buyers.

For more information, contact AngusSource<sup>SM</sup> at 816-383-5100 or [angussource@angus.org](mailto:angussource@angus.org) or visit [www.angussource.com](http://www.angussource.com)

## ANGUS SOURCE “Rebate” Program

### From Benoit Angus

Benoit Angus will buy 20 “Angus Source” tags for every bull purchased at Benoit Angus for the last two years and in the future.

To participate in the Angus Source program, commercial customers must first complete the “Beef Improvement Records” enrollment form, available in printed form from the American Angus Association or online at [www.angussource.com](http://www.angussource.com). Tags may then be ordered in one or two ways, [www.angussource.com](http://www.angussource.com) or by calling the AAA. Allow at least two weeks for tag orders to be processed and shipped to you.

After tags have been ordered, Fax or e-mail a copy of the AAA receipt/invoice (you will receive this from the AAA a few days after your order is processed) to Benoit Angus. If you are using bulls not purchased from Benoit Angus, please indicate the total number of tags ordered from Benoit Angus sired calves only, and we will send you a check for these tags.

For more information on the Angus Source program, contact the AAA Commercial Programs department at 816-383-5100 or go to [www.angussource.com](http://www.angussource.com). Thank you for your continued use of Benoit Angus Genetics!

**\$Values** are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A \$Value has meaning only when used in comparison to the \$Value of another animal. For example, just as with EPDs, variation in \$Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

\$Values			
\$W	\$F	\$G	\$B
+21.28	+13.60	+12.53	+25.32

**Weaned Calf Value (\$W):** an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F):** an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

**Grid Value (\$G):** an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B):** an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

## How do I use them?

\$Values should be used to complement the criteria that producers already use when selecting bulls.

The \$Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

The \$W, \$F, \$G and \$B values on individual animals and the Sire Evaluation Report may be viewed at [www.angus.org](http://www.angus.org).
