ACCOMMODATIONS

Call Benoit Angus at (888) 870-2855

TRANSPORTATION

Airstrips for small planes are available in Smith Center, KS. If you need information, call (888) 870-2855. We will arrange for pick-up service from the airport in our area if notified before.

TERMS AND CONDITIONS

Cattle will sell under the suggested terms and conditions of the American Angus Association
(http://www.angus.org/Pub/suggest_sale_terms.pdf)

HERD HEALTH

The bulls were fertility tested on February 24th & 25th and scrotal measurements were taken then. The bulls in the sale have been pre-weaned and weaning vaccinated for respiratory disease. They have been poured and dewormed.

All potential carriers of AM, NH, CA & DD have been tested and all cattle will sell AMF-NHF-CAF-DDF.

All cattle are eligible for interstate shipment and will be accompanied by proper health certificate.

SALE BOOK UPDATE

A supplemental sheet will be available sale day with updated information. This sheet will take precedence over the sale book. We will post updates as soon as possible on our website.

LIVESTOCK INSURANCE

Jensen Livestock Agency, Sheila Jensen, (785) 262-1116, agent for American Livestock, Inc.

LOT NUMBERS

Ear tags on cattle correspond with lot numbers in this book.

DELIVERY

Free delivery. All bulls will be delivered free in Nebraska or Kansas, or we will keep them 30 days and you pick them up, your choice. We will start to deliver a week after the sale. You can take them home the day of the sale and we will give \$50 off each bull purchased. All bulls selling over \$5,000 outside of Kansas and Nebraska will be delivered to a central point. This does not apply to any female lots. Transportation of heifers is the responsibility of the buyer.

GUARANTEE

All cattle sell with a first breeding season guarantee. Bulls selling are guaranteed for 90 days from first turnout against breeding injury. If a replacement bull is available, he will be provided. If a replacement bulls in not available, credit will be given in our next sale. Credit will be for the purchase price less volume discounts and salvage value of the injured bull, to be used for the purchase of one replacement bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to October 1, 2020. This is not a mortality insurance policy. Mortality insurance will be available sale day.

MEALS

Coffee and donuts in the morning.
Complimentary lunch will be served at 11:30 a.m.

Dear Producers,

Thank you for viewing this catalog for our 31st Annual Production Sale. We are selling 150 bulls and 10 top Confidence Plus spring open heifers.

The bulls selling will be the deepest in quality and quantity that we have ever produced. All of the cattle selling will be DNA tested and their EPD's are genomically enhanced for greater accuracy. We have many sire groups available that are from some of the elite AI sires in the Angus breed. We do not CREEP FEED in order to let us see how each individual dam is doing. We expect our cows to produce and breed back every year in the environment that is similar to our commercial cattle customers. We have collected all of the performance weights and ultrasounded the bulls and heifers. All of this data is in the catalog.

The Confidence Plus heifers we are selling are 10 of the best in our heifer calf crop. We have over 80 Plus daughters in production and still have semen available for use so we are sharing some of our top heifers with you. Included in this group is a full sister to our high selling bull last year, Plus One., and a $\frac{3}{4}$ sister out of a Template daughter of Plus Ones dam. Also, in this group of 10 is the top heifer in each flush of Plus daughters from 4 top donor cows in our herd. As you will see they are real herd builders for your future.

Videos of these animals will be available on our website ,benoitangus.com or on the angus.org website . We will be running all cattle through the ring to show their disposition and type at auction time. Again, thank you for your interest in our program and if you have any questions, please give us a call. We welcome you to come visit us anytime before the sale to view these cattle and the dams that raised them.

Sincerely

Benoit Angus
Everett , Doug, Chad and families

Confidence Plus

Kate Roberts
Sire and Grandsire of Lots 1-36

Elbanna of Conanga 1209

Confidence Plus was our pick of the bulls at the Connealy Angus sale in 2013. Plus is one of the elite sires in the Angus breed and his progeny are sought after with top selling bulls and females in sales across the country. Plus is a moderate framed, calving ease bull with outstanding growth, extremely docile, great footed and top carcass. His daughters in production have beautiful udders, easy fleshing, and are very fertile. We have approximately 80 direct daughters that will calve this spring and they are the type of cow that we are striving for here at Benoit Angus. Plus's epd profile boasts 18 epd's in the top 25% of the breed with an impressive top 1% \$M, 3% \$W, and 5% \$B. Not many bulls can match. Plus's dam, Elbanna of Conanga 1209, was the \$120,000 Pick of the dams at the 2017 Connealy Angus sale. The 1209 cow boasts an index value of top 1% \$W, 2% \$W, and 3% \$B. The now deceased Confidence Plus is a Genex sire and his semen is in high demand.

E&B Plus One

- . Plus One was our high selling bull last year going to Tailor Made Genetics, Montana & Byrd Cattle Co., California.
- . A full sister to Plus One that was raised at Benoit Angus was sold at auction for \$200,000 in the Spruce Mountain sale in CO.
- . A 10% revenue-sharing semen interest was sold for \$100,000 at the most recent National Finals sale in Las Vegas.

Repeat Buyer Discount

To show our appreciation for the support of our loyal repeat customers over the years, we are offering a Repeat Buyer Discount. This discount will be 5% from your total purchase price if you purchased a bull in the prior year's sale. This discount will involve only the previous year's sale, not just any previous sale. If you did not purchase a bull last year, but purchased a bull this year, you will receive a 5% discount on our purchase in next year's sale should you decide to be a repeat customer. This will be an ongoing process that will continue in upcoming years. This discount does not pertain to the heifer lots.

* Dam 6133 is a top looking and producing Plus daughter and granddam is a beautiful made six year old New Day 454 cow.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
 - more accurate selection
 - easier identification of genetic outliers
 - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

Confidence Plus Heifers

Elbanna of Conanga 1209

Confidence Plus was our pick of the bulls at the Connealy Angus sale in 2013. Plus is one of the elite sires in the Angus breed and his progeny are sought after with top selling bulls and females in sales across the country. Plus is a moderate framed, calving ease bull with outstanding growth, extremely docile, great footed and top carcass. His daughters in production have beautiful udders, easy fleshing, and are very fertile. We have approximately 80 direct daughters that will calve this spring and they are the type of cow that we are striving for here at Benoit Angus.

Plus's epd profile boasts 18 epd's in the top 25% of the breed with an impressive top 1% \$M, 3% \$W, and 5% \$B. Not many bulls can match. Plus's dam, Elbanna of Conanga 1209, was the \$120,000 Pick of the dams at the 2017 Connealy Angus sale. The 1209 cow boasts an index value of top 1% \$W, 2% \$W, and 3% \$B. The now deceased Confidence Plus is a Genex sire and his semen is in high demand.

- . Plus One was our high selling bull last year going to Tailor Made Genetics, Montana & Byrd Cattle Co., California.
- . A full sister to Plus One that was raised at Benoit Angus was sold at auction for \$200,000 in the Spruce Mountain sale in CO.
- . A 10% revenue-sharing semen interest was sold for \$100,000 at the most recent National Finals sale in Las Vegas.

* 9168 is a super looking Plus daughter with some excellent cows in her pedigree.
 * Plus, Bismarck and Power Alliance is a truly maternal pedigree with super udder type.
 * Plus daughters you will love as they are making excellent cows for us.

COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®. Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions. A commitment to the female starts with MaternalPlus.

Contact AGI at 816-383-5100 or agi@angus.org for more information.

ANGUS MEANS BUSINESS.

ANGUS
 THE BUSINESS BREED
www.ANGUS.org

American Angus Association \$Value Indexes

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

ANGUS
THE BUSINESS BREED

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Cow Energy Value (\$EN), an index expressed in dollars per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in future daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing \$EN savings differences include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.
